American Journal of Physiology:
Cell Physiology

No. 1. JULY 1997

Phospholamban ablation enhances relaxation in the murine soleus
J. P. Slack, I. L. Grupp, W. Luo, and E. G. Kranias C1

Regulation of mitogenesis by kinins in arterial smooth muscle cells
B. S. Dixon and M. J. Dennis C7

Volume transport across tracheal and bronchial airway epithelia in a tubular culture system
B. R. Grubb, F. R. Schiretz, and R. C. Boucher C21

Effects of fluid flow on intracellular calcium in bovine articular chondrocytes
C. E. Yellowley, C. R. Jacobs, Z. Li, Z. Zhou, and H. J. Donahue C30

Measurement of mitochondrial calcium in single living cardiomyocytes by selective removal of cytosolic indo 1
E. J. Griffiths, M. D. Stern, and H. S. Silverman C37

Inhibition of maxi-K currents in ferret portal vein smooth muscle cells by the antifungal clotrimazole
A. R. Rittenhouse, C. Parker, C. Brugnara, K. G. Morgan, and S. L. Alper C45

Characterization of volume-sensitive taurine- and Cl^--permeable channels
L. J. V. Galietta, S. Falzoni, F. Di Virgilio, G. Romeo, and O. Zegarra-Moran C57

Mechanisms of electrolyte transport across the endometrium. II. Regulation by GRP and substance P
A. E. Vetter and S. M. O'Grady C67

Inhibition of polyamine synthesis influences contractility of intestinal smooth muscle in culture
K. Swärd, B.-O. Nilsson, and P. Hellstrand C77

Force decline during muscle relaxation promotes calcium release to the cytosol
A. J. Baker and M. W. Weiner C85

Mechanism of the acceleration of CO_2 production from pyruvate in liver mitochondria by HCO_3^-
Y. Taguchi, Y. Ono, L. Lin, B. T. Storey, S. J. Dodgson, and R. E. Forster C92

$p70^{s6k}$ is activated by CCK in rat pancreatic acini
M. J. Bragado, G. E. Groblewski, and J. A. Williams C101

Ca^{2+}-activated K^+ channels regulate action potential repolarization in urinary bladder smooth muscle
T. J. Heppner, A. D. Bonev, and M. T. Nelson C110

Colocalization of gold-labeled LDL and fibrinogen on platelets: enhanced fibrinogen binding induced by LDL
I. Volf, E. Koller, E. Bielek, and F. Koller C118

Overexpression of protein kinase C-ζ isoform increases cyclooxygenase-2 and inducible nitric oxide synthase
B. W. Miller, L. D. Baier, and A. R. Morrison C130

Cyanide suppression of inwardly rectifying K^+ channels in guinea pig chromaffin cells involves dephosphorylation
M. Inoue, Y. Sakamoto, A. Yano, and I. Imanaga C137

cAMP-dependent sulfate secretion by the rabbit distal colon: a comparison with electrogenic chloride secretion
R. W. Freel, M. Hatch, and N. D. Vaziri C148

Effects of pinacidil on K^+ channels in human coronary artery vascular smooth muscle cells
R. Bychkov, M. Gollasch, C. Ried, F. C. Luft, and H. Haller C161

Phosphocreatine content in single fibers of human muscle after sustained submaximal exercise
K. Sahlin, K. Söderlund, M. Tonkonogi, and K. Hirakoba C172

Extracellular matrix-anchored serum amyloid A preferentially induces mast cell adhesion
R. Hershkoviz, L. Preciado-Patt, O. Lider, M. Fridkin, J. Dastych, D. D. Metcalfe, and Y. A. Mekori C179

Molecular characterization of the Na-K-Cl cotransporter of bovine aortic endothelial cells
T. R. Yerby, C. R. T. Vibat, D. Sun, J. A. Payne, and M. E. O'Donnell C188

Length-dependent potentiation and myosin light chain phosphorylation in rat gastrocnemius muscle
D. E. Rassier, L. A. Tubman, and B. R. MacIntosh C198

Energy turnover of vascular endothelial cells
O. Culic, M. L. H. Gruwel, and J. Schrader C205

Swelling-activated efflux of taurine and other organic osmolytes in endothelial cells
V. G. Manolopoulos, T. Voets, P. E. Declercq, G. Droogmans, and B. Nilius C214

bFGF induces *BCK* promoter-driven expression in muscle via increased binding of a nuclear protein
L. Kim, A. Steves, M. Collins, J. Fu, and M. E. Ritchie C223

Possible thiol group involvement in intracellular pH effect on low-conductance Ca^{2+}-dependent K^+ channels
G. Riquelme, M. Díaz, and F. V. Sepúlveda C230

Thrombin promotes endothelial cell alignment in Matrigel in vitro and angiogenesis in vivo
G. C. Haralabopoulos, D. S. Grant, H. K. Kleinman, and M. E. Maragoudakis C239

Morphological and biochemical evidence of muscle hyperplasia following weight-lifting exercise in rats
T. Tamaki, A. Akatsuka, M. Tokunaga, K. Ishige, S. Uchiyama, and T. Shiraishi C246

Na^+/Ca^{2+} exchanger in *Drosophila*: cloning, expression, and transport differences
A. Ruknudin, C. Valdivia, P. Kofuji, W. J. Lederer, and D. H. Schulze C257

Basis of passive tension and stiffness in isolated rabbit myofibrils
M. L. Bartoo, W. A. Linke, and G. H. Pollack C266

Upregulation of COX-2 in cerebral microvascular endothelial cells by smooth muscle cell signals
H. Parfenova, T. H. Eidson, and C. W. Leffler C277

Sapecin B, a novel fly toxin, blocks macroscopic K^+ currents in the GH_3 rat pituitary cell line
N. Suzuki, M. Hirono, K. Kawahara, and T. Yoshioka C289

Early functional and biochemical adaptations to low-frequency stimulation of rabbit fast-twitch muscle
A. Hicks, K. Ohlendieck, S. O. Göpel, and D. Pette C297

Activation of glycolysis in human muscle in vivo
K. E. Conley, M. L. Blei, T. L. Richards, M. J. Kushmerick, and S. A. Jubrias C306

A volume-sensitive, IP_3-insensitive Ca^{2+} store in vascular endothelial cells
M. Jena, J. F. Minore, and W. C. O'Neill C316

Expression of adenylyl cyclase mRNAs in the adult, in developing, and in the Brattleboro rat kidney
T. Shen, Y. Suzuki, M. Poyard, N. Miyamoto, N. Defer, and J. Hanoune C323

MODELING IN PHYSIOLOGY

Bursting behavior during fixed-delay stimulation of spontaneously beating chick heart cell aggregates
A. M. Kunysz, A. Shrier, and L. Glass C331

No. 2. AUGUST 1997

INVITED REVIEW

Myosin I
L. M. Coluccio C347

Role of concentration and size of intracellular macromolecules in cell volume regulation
J. C. Summers, L. Trais, R. Lajvardi, D. Hergan, R. Buechler, H. Chang, C. Peña-Rasgado, and H. Rasgado-Flores C360

Coordinated expression of myosin heavy chain isoforms and metabolic enzymes within overloaded rat muscle fibers
S. E. Dunn and R. N. Michel C371

Characterization of the human pH- and PKA-activated ClC-2G(2α) Cl^- channel
A. M. Sherry, K. Stroffekova, L. M. Knapp, E. Y. Kupert, J. Cuppoletti, and D. H. Malinowska C384

Myosin heavy chain gene expression in neonatal rat heart cells: effects of $[Ca^{2+}]_i$ and contractile activity
M. Qi, J. L. Puglisi, K. L. Byron, K. Ojamaa, I. Klein, D. M. Bers, and A. M. Samarel C394

Control of cytosolic pH in two-cell mouse embryos: roles of H^+-lactate cotransport and Na^+/H^+ exchange
C. A. Gibb, P. Poronnik, M. L. Day, and D. I. Cook C404

Sarco(endo)plasmic reticulum Ca^{2+} pump isoform SERCA3 is more resistant than SERCA2b to peroxide
A. K. Grover, S. E. Samson, and C. M. Misquitta C420

Cystic fibrosis affects specific cell type in sweat gland secretory coil
M. M. Reddy, C. L. Bell, and P. M. Quinton C426

Substrate-dependent expression of Na^+ transport and shunt conductance in A6 epithelia
S. I. Helman and X. Liu C434

Immuno and functional characterization of CFTR in submandibular and pancreatic acinar and duct cells
W. Zeng, M. G. Lee, M. Yan, J. Diaz, I. Benjamin, C. R. Marino, R. Kopito, S. Freedman, C. Cotton, S. Muallem, and P. Thomas C442

Apical and basolateral membrane mechanisms that regulate pH_i in bovine retinal pigment epithelium
E. Kenyon, A. Maminishkis, D. P. Joseph, and S. S. Miller C456

Exogenous fructose 1,6-bisphosphate reduces K^+ permeability in isolated rat hepatocytes
T. Roig, R. Bartrons, and J. Bermúdez C473

Two mechanisms by which ATP depletion potentiates induction of the mitochondrial permeability transition
G. Simbula, P. A. Glascott, Jr., S. Akita, J. B. Hoek, and J. L. Farber C479

Hormonal and neurogenic control of Na-K-ATPase and myosin isoforms in neonatal rat cardiac myocytes
E. Arystarkhova and K. J. Sweadner C489

M_2 receptor activation of nonselective cation channels in smooth muscle cells: calcium and G_i/G_o requirements
Y.-X. Wang, B. K. Fleischmann, and M. I. Kotlikoff C500

Muscarinic signaling pathway for calcium release and calcium-activated chloride current in smooth muscle
Y.-X. Wang and M. I. Kotlikoff C509

Ca^{2+}-activated Cl^- currents are activated by metabolic inhibition in rat pulmonary artery smooth muscle cells
Q. Wang, Y.-X. Wang, M. Yu, and M. I. Kotlikoff C520

Inhibition of intestinal Cl^- secretion by clotrimazole: direct effect on basolateral membrane K^+ channels
D. C. Devor, A. K. Singh, A. C. Gerlach, R. A. Frizzell, and R. J. Bridges C531

Contribution of a swelling-activated chloride current to changes in the cardiac action potential
J. I. Vandenberg, G. C. L. Bett, and T. Powell C541

Prostaglandin E_2 increases 7-pS Cl^- channel density in the apical membrane of A6 distal nephron cells
K. E. Kokko, P. S. Matsumoto, Z.-R. Zhang, B. N. Ling, and D. C. Eaton C548

Adaptation to low-K^+ media increases H^+-K^+-ATPase but not H^+-ATPase-mediated pH_i recovery in $OMCD_1$ cells
J. Guntupalli, M. Onuigbo, S. Wall, R. J. Alpern, and T. D. DuBose, Jr. C558

Differential activation of NF-κB in human aortic endothelial cells conditioned to specific flow environments
S. Mohan, N. Mohan, and E. A. Sprague C572

Apoptosis: a mechanism contributing to remodeling of skeletal muscle in response to hindlimb unweighting
D. L. Allen, J. K. Linderman, R. R. Roy, A. J. Bigbee, R. E. Grindeland, V. Mukku, and V. R. Edgerton C579

Functional properties of conditioned skeletal muscle: implications for muscle-powered cardiac assist
D. R. Trumble, W. A. LaFramboise, C. Duan, and J. A. Magovern C588

Different effects of raised $[K^+]_o$ on membrane potential and contraction in mouse fast- and slow-twitch muscle
S. P. Cairns, W. A. Hing, J. R. Slack, R. G. Mills, and D. S. Loiselle C598

Cholinergic modulation of the Ca^{2+} response to bradykinin in neuroblastoma cells
J. S. Coggan and S. H. Thompson C612

Suppression of neuropeptide Y_1 receptor function in SK-N-MC cells by nitric oxide
J. Dötsch, J. Hänze, O. Beste, J. Behrendt, W.-M. Weber, K. Dittrich, and W. Rascher C618

Regulation of native Kv1.3 channels by cAMP-dependent protein phosphorylation
I. Chung and L. C. Schlichter C622

Ammonia effect on calcium-activated chloride secretion in T84 intestinal epithelial monolayers
J. M. Mayol, B. J. Hrnjez, H. I. Akbarali, J. C. Song, J. A. Smith, and J. B. Matthews C634

Dual modulation of Na/H antiport by atrial natriuretic factor in rat aortic smooth muscle cells
R. Ricci, P. Baldini, L. Bogetto, P. De Vito, P. Luly, A. Zannetti, and S. Incerpi C643

Neutrophil-mediated phospholipid peroxidation assessed by gas chromatography-mass spectroscopy
J. J. Zimmerman, W. Ciesielski, and J. Lewandoski C653

Actin removal from cardiac myocytes shows that near Z line titin attaches to actin while under tension
K. Trombitás and H. Granzier C662

Protein kinase and Ca^{2+} modulation of *myo*-inositol transport in cultured retinal pigment epithelial cells
A. Karihaloo, K. Kato, D. A. Greene, and T. P. Thomas C671

Effects of P_2 purinergic receptor stimulation in brown adipocytes
S. C. Lee and P. A. Pappone C679

Experimentally induced changes in the endocytic traffic of P-glycoprotein alter drug resistance of cancer cells
H. Kim, M. Barroso, R. Samanta, L. Greenberger, and E. Sztul C687

Occurrence and putative hormone regulatory function of a constitutive heme oxygenase in rat pancreatic islets
R. Henningsson, P. Alm, and I. Lundquist C703

Unopposed phosphatase action initiates ezrin dysfunction: a potential mechanism for anoxic injury
J. Chen and L. J. Mandel C710

MODELING IN PHYSIOLOGY

Minimal model of β-cell mitochondrial Ca^{2+} handling
G. Magnus and J. Keizer C717

SPECIAL COMMUNICATION

Normalization of ion transport in murine cystic fibrosis nasal epithelium using gene transfer
L. J. MacVinish, C. Goddard, W. H. Colledge, C. F. Higgins, M. J. Evans, and A. W. Cuthbert C734

RAPID COMMUNICATIONS

Differential effects of creatine kinase isoenzymes and substrates on regeneration in livers of transgenic mice
N. Askenasy and A. P. Koretsky C741

Genistein activates CFTR Cl^- channels via a tyrosine kinase- and protein phosphatase-independent mechanism
P. J. French, J. Bijman, A. G. Bot, W. E. M. Boomaars, B. J. Scholte, and H. R. de Jonge C747

ANNOUNCEMENTS C754

No. 3. SEPTEMBER 1997

INVITED REVIEW

Volume expansion-sensing outward-rectifier Cl^- channel: fresh start to the molecular identity and volume sensor
Y. Okada C755

Isolated bovine retinal pigment epithelial cells express delayed rectifier type and M-type K^+ currents
M. Takahira and B. A. Hughes C790

Purinergic agonists, but not cAMP, stimulate coupled granule fusion and Cl^- conductance in HT29-Cl.16E
X. W. Guo, D. Merlin, C. Laboisse, and U. Hopfer C804

Mechanotransduction in bone: osteoblasts are more responsive to fluid forces than mechanical strain
I. Owan, D. B. Burr, C. H. Turner, J. Qiu, Y. Tu, J. E. Onyia, and R. L. Duncan C810

ARF-independent inhibition of the carbachol-induced contractions by brefeldin A in intestinal smooth muscle
G. Loirand, C. Cario-Toumaniantz, P. Chardin, and P. Pacaud C816

Polarized distribution of L-type calcium channels in early sea urchin embryos
B. Dale, I. Yazaki, and E. Tosti C822

CGP-42112 partially activates human monocytes and reduces their stimulation by lipopolysaccharides
G. Egidy, J. Friedman, M. Viswanathan, L. M. Wahl, and J. M. Saavedra C826

Inhibition of oxidative phosphorylation, vascular tone, and $[Ca^{2+}]_i$ in the perfused rat tail artery
N. N. P. Tran, A. Robert, J. Atkinson, and C. Capdeville-Atkinson C834

Mechanisms of renal tubular cell hypertrophy: mitogen-induced suppression of proteolysis
H. A. Franch, P. V. Curtis, and W. E. Mitch C843

Oxygen dependence of mitochondrial function measured by high-resolution respirometry in long-term hypoxic rats
L. E. Costa, G. Méndez, and A. Boveris C852

Cytoplasmic codiffusion of fatty acids is not specific for fatty acid binding protein
B. A. Luxon and M. T. Milliano C859

Muscarinic receptor stimulation modulates the effect of halothane on Mn^{2+} influx in airway smooth muscle
D. O. Warner, K. A. Jones, R. R. Lorenz, and C. M. Pabelick C868

Chloride channels in primary cultures of seawater fish (*Dicentrarchus labrax*) gill
C. Duranton, M. Tauc, M. Avella, and P. Poujeol C874

Modulation of high- and low-voltage-activated calcium currents in smooth muscle by calcium
J. G. McCarron, J. G. McGeown, J. V. Walsh, Jr., and F. S. Fay C883

PKA-mediated phosphorylation and inhibition of Na^+-K^+-ATPase in response to β-adrenergic hormone
X.-J. Cheng, G. Fisone, O. Aizman, R. Aizman, R. Levenson, P. Greengard, and A. Aperia C893

Hypertonic induction of the cell adhesion molecule β_1-integrin in MDCK cells
D. Sheikh-Hamad, W. N. Suki, and W. Zhao C902

Xanthine affects $[Ca^{2+}]_i$ and contractile responses of ventricular cardiocytes to electrical stimulation
T. T. Rohn, A. Sauvadet, C. Pavoine, and Françoise Pecker C909

Ecto-enzymatic hydrolysis of diadenosine polyphosphates by cultured adrenomedullary vascular endothelial cells
J. Mateo, M. T. Miras-Portugal, and P. Rotllán C918

Sphingosine prevents diacylglycerol signaling to mitogen-activated protein kinase in airway smooth muscle
D. Tolan, A.-M. Conway, N. J. Pyne, and S. Pyne C928

Differential activation of PKC-δ and -ζ by α_1-adrenergic stimulation in human airway epithelial cells
C. M. Liedtke, T. Cole, and M. Ikebe C937

Single-fiber and whole muscle analyses of MHC isoform plasticity: interaction between T_3 and unloading
V. J. Caiozzo, M. J. Baker, S. A. McCue, and K. M. Baldwin C944

Molecular cloning of two rat GRK6 splice variants
D. Firsov and J.-M. Elalouf C953

Roles of outward potassium currents in the action potentials of guinea pig ureteral myocytes
J. L. Sui and C. Y. Kao C962

Stage-specific expression of P2Y receptors, ecto-apyrase, and ecto-5′-nucleotidase in myeloid leukocytes
E. E. Clifford, K. A. Martin, P. Dalal, R. Thomas, and G. R. Dubyak C973

Genistein potentiates wild-type and ΔF508-CFTR channel activity
T.-C. Hwang, F. Wang, I. C.-H. Yang, and W. W. Reenstra C988

Modulation by extracellular Cl^- of volume-activated organic osmolyte and halide permeabilities in HeLa cells
A. Stutzin, A. L. Eguiguren, L. P. Cid, and F. V. Sepúlveda C999

Effects of extracellular pH, P_{CO_2}, and HCO_3^- on intracellular pH in isolated rat taste buds
V. Lyall, G. M. Feldman, G. L. Heck, and J. A. DeSimone C1008

Polyamines modulate transcription but not posttranscription of c-*myc* and c-*jun* in IEC-6 cells
A. R. Patel and J.-Y. Wang C1020

CD14-dependent mechanism for endotoxin-mediated nitric oxide synthesis in murine macrophages
R. A. Schroeder, A. delaTorre, and P. C. Kuo C1030

Modulation of K^+ and Ca^{2+} currents in cultured neurons by an angiotensin II type 1a receptor peptide
M. Zhu, R. R. Neubig, S. M. Wade, P. Posner, C. H. Gelband, and C. Sumners C1040

Determinants of work produced by skeletal muscle: potential limitations of activation and relaxation
V. J. Caiozzo and K. M. Baldwin C1049

Optimal shortening velocities for in situ power production of rat soleus and plantaris muscles
S. J. Swoap, V. J. Caiozzo, and K. M. Baldwin C1057

Evidence for an amiloride-insensitive Na^+/H^+ exchanger in rat renal cortical tubules
R. Chambrey, J.-M. Achard, P. L. St. John, D. R. Abrahamson, and D. G. Warnock C1064

A role for retrosomes in intracellular cholesterol transport from endosomes to the plasma membrane
C. A. Hornick, D. Y. Hui, and J. G. DeLamatre C1075

Effects of epinephrine on insulin-stimulated glucose uptake and GLUT-4 phosphorylation in muscle
A. D. Lee, P. A. Hansen, J. Schluter, E. A. Gulve, J. Gao, and J. O. Holloszy C1082

Serum transcriptionally regulates Na^+-K^+-ATPase gene expression in vascular smooth muscle cells
J. Nemoto, S. Muto, A. Ohtaka, K. Kawakami, and Y. Asano C1088

Upregulation of $P2Y_2$ nucleotide receptors in rat salivary gland cells during short-term culture
J. T. Turner, G. A. Weisman, and J. M. Camden C1100

No. 4. OCTOBER 1997

INVITED REVIEW

Three-dimensional cell cultures: from molecular mechanisms to clinical applications
W. Mueller-Klieser C1109

Glutamine utilization by rat neutrophils: presence of phosphate-dependent glutaminase
T. C. Pithon Curi, M. P. De Melo, R. B. De Azevedo, T. M. T. Zorn, and R. Curi C1124

Intestinal ischemia and reperfusion injury in transgenic mice overexpressing copper-zinc superoxide dismutase
D. R. Deshmukh, O. Mirochnitchenko, V. S. Ghole, D. Agnese, P. C. Shah, M. Reddell, R. E. Brolin, and M. Inouye C1130

Role of β_1- and β_3-adrenoceptors in the regulation of lipolysis and thermogenesis in rat brown adipocytes
C. Atgié, F. D'Allaire, and L. J. Bukowiecki C1136

Expression of dopamine D_2 receptor in PC-12 cells and regulation of membrane conductances by dopamine
W. H. Zhu, L. Conforti, and D. E. Millhorn C1143

Hyaluronic acid-specific regulation of cytokines by human uterine fibroblasts
H. Kobayashi and T. Terao C1151

Activation of NF-κB in intestinal epithelial cells by enteropathogenic *Escherichia coli*
S. D. Savkovic, A. Koutsouris, and G. Hecht C1160

Ca^{2+}-sensing receptors in intestinal epithelium
L. Gama, L. M. Baxendale-Cox, and G. E. Breitwieser C1168

Cloning and functional expression of a ClC Cl^- channel from the renal cell line A6
S. Lindenthal, S. Schmieder, J. Ehrenfeld, and N. K. Wills C1176

Carbachol induces oscillations in membrane potential and intracellular calcium in a colonic tumor cell line, HT-29
P. Sand, T. Svenberg, and B. Rydqvist C1186

Functional upregulation of H^+-ATPase by lethal acid stress in cultured inner medullary collecting duct cells
H. Amlal, Z. Wang, and M. Soleimani C1194

Effects of PKCα activation on Ca^{2+} pump and K_{Ca} channel in deoxygenated sickle cells
H. Fathallah, M. Sauvage, J. R. Romero, M. Canessa, and F. Giraud C1206

F-actin modulates swelling-activated chloride current in cultured chick cardiac myocytes
J. Zhang, T. H. Larsen, and M. Lieberman C1215

Protein synthesis-dependent potentiation by thyroxine of antiviral activity of interferon-γ
H.-Y. Lin, P. M. Yen, F. B. Davis, and P. J. Davis C1225

Human umbilical vein and dermal microvascular endothelial cells show heterogeneity in response to PKC activation
J. C. Mason, H. Yarwood, K. Sugars, and D. O. Haskard C1233

Regulation of vascular angiotensin II receptors by EGF
M. E. Ullian, J. R. Raymond, M. C. Willingham, and R. V. Paul C1241

Peroxide resistance of ER Ca^{2+} pump in endothelium: implications to coronary artery function
A. K. Grover and S. E. Samson C1250

Expression of smooth muscle myosin heavy chains and unloaded shortening in single smooth muscle cells
D. P. Meer and T. J. Eddinger C1259

Partial cloning and characterization of *Slc12a2*: the gene encoding the secretory Na^+-K^+-$2Cl^-$ cotransporter
J. Randall, T. Thorne, and E. Delpire C1267

Block by MOPS reveals a conformation change in the CFTR pore produced by ATP hydrolysis
H. Ishihara and M. J. Welsh C1278

Cell cycle-dependent expression of a glioma-specific chloride current: proposed link to cytoskeletal changes
N. Ullrich and H. Sontheimer C1290

Tunicamycin increases intracellular calcium levels in bovine aortic endothelial cells
B. J. Buckley and A. R. Whorton C1298

Ryanodine receptor expression is associated with intracellular Ca^{2+} release in rat parotid acinar cells
X. Zhang, J. Wen, K. R. Bidasee, H. R. Besch, Jr., and R. P. Rubin C1306

The Ca^{2+}-sensing receptor: a target for polyamines
S. J. Quinn, C.-P. Ye, R. Diaz, O. Kifor, M. Bai, P. Vassilev, and E. Brown C1315

ANG II AT_1 and AT_2 receptors both inhibit bFGF-induced proliferation of bovine adrenocortical cells
P. Liakos, N. Bourmeyster, G. Defaye, E. M. Chambaz, and S. P. Bottari C1324

Male sex steroids are responsible for depressing macrophage immune function after trauma-hemorrhage
M. W. Wichmann, A. Ayala, and I. H. Chaudry C1335

Role of water and electrolyte influxes in anoxic plasma membrane disruption
J. Chen and L. J. Mandel C1341

Parathyroid hormone stimulates calcium influx and the cAMP messenger system in rat enterocytes
G. Picotto, V. Massheimer, and R. Boland C1349

Adenosine stimulates Cl^- channels of nonpigmented ciliary epithelial cells
D. A. Carré, C. H. Mitchell, K. Peterson-Yantorno, M. Coca-Prados, and M. M. Civan C1354

Regulation of apolipoprotein A-I gene expression in Hep G2 cells depleted of Cu by cupruretic tetramine
J. Y. J. Wu, J. J. Zhang, Y. Wang, S. K. Reaves, Y. R. Wang, P. P. Lei, and K. Y. Lei C1362

β-Adrenergic regulation of constitutive nitric oxide synthase in cardiac myocytes
A. J. Kanai, S. Mesaros, M. S. Finkel, C. V. Oddis, L. A. Birder, and T. Malinski C1371

Physiological regulation of epithelial tight junctions is associated with myosin light-chain phosphorylation
J. R. Turner, B. K. Rill, S. L. Carlson, D. Carnes, R. Kerner, R. J. Mrsny, and J. L. Madara C1378

Evidence for heteromeric gap junction channels formed from rat connexin43 and human connexin37
P. R. Brink, K. Cronin, K. Banach, E. Peterson, E. M. Westphale, K. H. Seul, S. V. Ramanan, and E. C. Beyer C1386

Kinetics of creatine kinase in an experimental model of low phosphocreatine and ATP in the normoxic heart
V. Stepanov, P. Mateo, B. Gillet, J. C. Beloeil, P. Lechene, and J. A. Hoerter C1397

Effect of osmolarity on LDL binding and internalization in hepatocytes
A. Krämer-Guth, G. L. Busch, N. K. Kaba, S. Schwedler, C. Wanner, and F. Lang C1409

MODELING IN PHYSIOLOGY

Predicted changes in concentrations of free and bound ATP and ADP during intracellular Ca^{2+} signaling
M. E. Kargacin and G. J. Kargacin C1416

SPECIAL COMMUNICATION

Gene expression of natriuretic peptide receptors in rats with DOCA-salt hypertension
E. Nuglozeh, M. Mbikay, D. J. Stewart, and L. Legault C1427

LETTERS TO THE EDITOR

The role of Cl^- channels in volume regulation in bovine pigmented epithelial cells
J. S. Adorante and J. L. Edelman; T. J. C. Jacob and C. H. Mitchell C1435

Binding sites for amiloride in intact epithelia
A. W. Cuthbert; S. I. Helman and B. Blazer-Yost C1437

No. 5. NOVEMBER 1997

Regulation of tPA in endothelial cells exposed to cyclic strain: role of CRE, AP-2, and SSRE binding sites
B. E. Sumpio, R. Chang, W.-J. Xu, X.-J. Wang, and W. Du C1441

CCK-B receptors produce similar signals but have opposite growth effects in CHO and Swiss 3T3 cells
K. Detjen, D. Yule, M.-J. Tseng, J. A. Williams, and C. D. Logsdon C1449

Receptor-mediated inhibition of renal Na^+-K^+-ATPase is associated with endocytosis of its α- and β-subunits
A. V. Chibalin, A. I. Katz, P.-O. Berggren, and A. M. Bertorello C1458

Role of prostaglandin H synthase-2-mediated conversion of arachidonic acid in controlling 3T6 fibroblast growth
J. Martinez, T. Sanchez, and J. J. Moreno C1466

Cholecystokinin and EGF activate a MAPK cascade by different mechanisms in rat pancreatic acinar cells
A. Dabrowski, G. E. Groblewski, C. Schäfer, K.-L. Guan, and J. A. Williams C1472

Fluid and ion transport in corneal endothelium: insensitivity to modulators of Na^+-K^+-$2Cl^-$ cotransport
M. V. Riley, B. S. Winkler, C. A. Starnes, and M. I. Peters C1480

Mitochondrial function in oncogene-transfected rat fibroblasts isolated from multicellular spheroids
L. A. Kunz-Schughart, R. C. Habbersett, and J. P. Freyer C1487

Tissue distribution of Na^+/H^+ exchanger isoforms NHE2 and NHE4 in rat intestine and kidney
C. Bookstein, Y. Xie, K. Rabenau, M. W. Musch, R. L. McSwine, M. C. Rao, and E. B. Chang C1496

Negative transcriptional regulation of the VCAM-1 gene by fluid shear stress in murine endothelial cells
R. Korenaga, J. Ando, K. Kosaki, M. Isshiki, Y. Takada, and A. Kamiya C1506

Functional characterization of the neuronal-specific K-Cl cotransporter: implications for $[K^+]_o$ regulation
J. A. Payne C1516

Hormone-induced rise in cytosolic Ca^{2+} in axolotl hepatocytes: properties of the Ca^{2+} influx channel
T. Lenz and J. W. Kleineke C1526

P2 purinoceptor of the globular substance in the otoconial membrane of the guinea pig inner ear
H. Suzuki, K. Ikeda, M. Furukawa, and T. Takasaka C1533

Aquaporins in complex tissues. I. Developmental patterns in respiratory and glandular tissues of rat
L. S. King, S. Nielsen, and P. Agre C1541

Aquaporins in complex tissues. II. Subcellular distribution in respiratory and glandular tissues of rat
S. Nielsen, L. S. King, B. M. Christensen, and P. Agre C1549

Aqp1 expression in erythroleukemia cells: genetic regulation of glucocorticoid and chemical induction
C. Moon, L. S. King, and P. Agre C1562

Hypoxia enhances induction of endothelial ICAM-1: role for metabolic acidosis and proteasomes
G. Zünd, S. Uezono, G. L. Stahl, A. L. Dzus, F. X. McGowan, P. R. Hickey, and S. P. Colgan C1571

Nitric oxide enhances hydrogen peroxide-mediated endothelial permeability in vitro
N. Okayama, C. G. Kevil, L. Correia, D. Jourd'heuil, M. Itoh, M. B. Grisham, and J. S. Alexander C1581

Niflumic acid differentially modulates two types of skeletal ryanodine-sensitive Ca^{2+}-release channels
T. Oba C1588

Permeability properties of monolayers of the human trophoblast cell line BeWo
F. Liu, M. J. Soares, and K. L. Audus C1596

Bradykinin-stimulated arachidonic acid release from MDCK cells is not protein kinase C dependent
C. R. J. Kennedy, R. L. Hébert, M. T. Do, and P. R. Proulx C1605

Oxygen sensitivity of mitochondrial metabolic state in isolated skeletal and cardiac myocytes
K. N. Richmond, S. Burnite, and R. M. Lynch C1613

Dipeptide-induced Cl^- secretion in proximal tubule cells
W. Jin and U. Hopfer C1623

Antisense oligodeoxynucleotide to PKC-δ blocks α_1-adrenergic activation of Na-K-2Cl cotransport
C. M. Liedtke and T. Cole C1632

Intermediate endocrine-acinar pancreatic cells in duct ligation conditions
E. Bertelli and M. Bendayan C1641

Steroid hormone-dependent expression of blocker-sensitive ENaCs in apical membranes of A6 epithelia
L. M. Baxendale-Cox, R. L. Duncan, X. Liu, K. Baldwin, W. J. Els, and S. I. Helman C1650

Growth factor-mediated K^+ channel activity associated with human myeloblastic ML-1 cell proliferation
L. Wang, B. Xu, R. E. White, and L. Lu C1657

Modulation of cardiac Ca^{2+} channels by isoproterenol studied in transgenic mice with altered SR Ca^{2+} content
H. Sako, S. A. Green, E. G. Kranias, and A. Yatani C1666

The mineralocorticoid aldosterone activates a proton conductance in cultured kidney cells
M. Gekle, S. Silbernagl, and H. Oberleithner C1673

Regulation of intracellular calcium in human esophageal smooth muscles
S. M. Sims, Y. Jiao, and H. G. Preiksaitis C1679

Effect of 17 days of bed rest on peak isometric force and unloaded shortening velocity of human soleus fibers
J. J. Widrick, J. G. Romatowski, J. L. W. Bain, S. W. Trappe, T. A. Trappe, J. L. Thompson, D. L. Costill, D. A. Riley, and R. H. Fitts C1690

Influence of bafilomycin A_1 on pH_i responses in cultured rabbit nonpigmented ciliary epithelium
Q. Wu and N. A. Delamere C1700

Retinoids regulate tight junctional resistance of cultured human cervical cells
G. I. Gorodeski, R. L. Eckert, D. Pal, W. H. Utian, and E. A. Rorke C1707

Long-term regulation of contractility and calcium current in smooth muscle
M. Gomez and K. Swärd C1714

Ca^{2+} dependence and pharmacology of large-conductance K^+ channels in nonlabor and labor human uterine myocytes
R. N. Khan, S. K. Smith, J. J. Morrison, and M. L. J. Ashford C1721

Glycolysis inhibition by palmitate in renal cells cultured in a two-chamber system
C. Bolon, C. Gauthier, and H. Simonnet C1732

Human cytomegalovirus infection enhances osmotic stimulation of Na^+/H^+ exchange in human fibroblasts
W. E. Crowe, A. A. Altamirano, and J. M. Russell C1739

Prostaglandin H synthase: protein synthesis-independent regulation in bovine aortic endothelial cells
M. Rosenstock, A. Danon, and G. Rimon C1749

Site-specific thrombin receptor antibodies inhibit Ca^{2+} signaling and increased endothelial permeability
L. T. Nguyen, H. Lum, C. Tiruppathi, and A. B. Malik C1756

Regulation of endothelin-1 gene expression by cell shape and the microfilament network in vascular endothelium
A. M. Malek, I. W. Lee, S. L. Alper, and S. Izumo C1764

RAPID COMMUNICATION

Elementary events of agonist-induced Ca^{2+} release in vascular endothelial cells
J. Hüser and L. A. Blatter C1775

No. 6. DECEMBER 1997

Mitochondrial permeability transition in pH-dependent reperfusion injury to rat hepatocytes
T. Qian, A.-L. Nieminen, B. Herman, and J. J. Lemasters C1783

P2Z purinoceptor-associated pores induced by extracellular ATP in macrophages and J774 cells
R. Coutinho-Silva and P. M. Persechini C1793

Reappearance of the minor α-sarcomeric actins in postnatal muscle
T. Collins, J. E. Joya, R. M. Arkell, V. Ferguson, and E. C. Hardeman C1801

Effect of changes in respiratory blood parameters on equine red blood cell K-Cl cotransporter
P. F. Speake, C. A. Roberts, and J. S. Gibson C1811

Stretch-dependent activation and desensitization of mitogen-activated protein kinase in carotid arteries
M. T. Franklin, C. L.-A. Wang, and L. P. Adam C1819

Regulation of red blood cell filterability by Ca^{2+} influx and cAMP-mediated signaling pathways
T. Oonishi, K. Sakashita, and N. Uyesaka C1828

Spontaneous acetylcholine release in mammalian neuromuscular junctions
A. Losavio and S. Muchnik C1835

Na^+-K^+-ATPase in frog esophagus mucociliary cell membranes: inhibition by protein kinase C activation
I. Gertsberg, I. Brodsky, Z. Priel, and M. Danilenko C1842

Contribution of the NH_2 terminus of Kv2.1 to channel activation
J. M. Pascual, C.-C. Shieh, G. E. Kirsch, and A. M. Brown C1849

Phosphorylation of occludin correlates with occludin localization and function at the tight junction
V. Wong C1859

Neuronal NOS gene expression in gastrointestinal myenteric neurons and smooth muscle cells
S. Chakder, A. Bandyopadhyay, and S. Rattan C1868

Functional coupling in bovine ciliary epithelial cells is modulated by carbachol
J. W. Stelling and T. J. C. Jacob C1876

Urea inhibits inducible nitric oxide synthase in macrophage cell line
S. S. Prabhakar, G. A. Zeballos, M. Montoya-Zavala, and C. Leonard C1882

Regulation of a cloned epithelial Na^+ channel by its β- and γ-subunits
M. S. Awayda, A. Tousson, and D. J. Benos C1889

Synchronized Ca^{2+} signaling by intercellular propagation of Ca^{2+} action potentials in NRK fibroblasts
A. D. G. De Roos, P. H. G. M. Willems, E. J. J. Van Zoelen, and A. P. R. Theuvenet C1900

Amidative peptide processing and vascular function
C. D. Oldham, C. Li, J. Feng, R. O. Scott, W. Z. Wang, A. B. Moore, P. R. Girard, J. Huang, R. B. Caldwell, R. W. Caldwell, and S. W. May C1908

Regulation of Ca^{2+} handling by phosphorylation status in mouse fast- and slow-twitch skeletal muscle fibers
Y. Liu, E. G. Kranias, and M. F. Schneider C1915

Histone-induced damage of a mammalian epithelium: the role of protein and membrane structure
T. J. Kleine, P. N. Lewis, and S. A. Lewis C1925

Functional and molecular characterization of NHE3 expression during ontogeny in rat jejunal epithelium
J. F. Collins, H. Xu, P. R. Kiela, J. Zeng, and F. K. Ghishan C1937

Changes in intracellular Ca^{2+} concentration induced by L-type Ca^{2+} channel current in guinea pig gastric myocytes
S. J. Kim, S. C. Ahn, J. K. Kim, Y. C. Kim, I. So, and K. W. Kim C1947

Downregulation of caveolin by chronic β-adrenergic receptor stimulation in mice
N. Oka, K. Asai, R. K. Kudej, J. G. Edwards, Y. Toya, C. Schwencke, D. E. Vatner, S. F. Vatner, and Y. Ishikawa C1957

Functional ATP receptors in rat anterior pituitary cells
C. Villalobos, S. R. Alonso-Torre, L. Núñez, and J. García-Sancho C1963

Evidence for an Na^+-K^+-Cl^- cotransporter in mammalian type I vestibular hair cells
K. J. Rennie, J. F. Ashmore, and M. J. Correia C1972

Regulation of rat Na^+-K^+-ATPase activity by PKC is modulated by state of phosphorylation of Ser-943 by PKA
X.-J. Cheng, J.-O. Höög, A. C. Nairn, P. Greengard, and A. Aperia C1981

Hyaluronidase enhancement of TNF-mediated cell death is reversed by TGF-β1
N.-S. Chang C1987

K^+ transport and capacitance of the basolateral membrane of the larval frog skin
S. D. Hillyard, H. F. Cantiello, and W. Van Driessche C1995

Mechanical stimulation increases expression of acetylcholinesterase in cultured myotubes
D. A. Hubatsch and B. J. Jasmin C2002

Small-conductance Ca^{2+}-dependent K^+ channels activated by ATP in murine colonic smooth muscle
S. D. Koh, G. M. Dick, and K. M. Sanders C2010

P_{2U} purinergic receptor inhibits apical I_{sK}/KvLQT1 channel via protein kinase C in vestibular dark cells
D. C. Marcus, H. Sunose, J. Liu, Z. Shen, and M. A. Scofield C2022

Interferon-γ induces a decrease in the intracellular calcium pump in a human salivary gland cell line
S. Meehan, A. J. Wu, E. C. Kang, T. Sakai, and I. S. Ambudkar C2030

Activation of the human histamine H_2 receptor is linked to cell proliferation and c-*fos* gene transcription
L.-D. Wang, M. Hoeltzel, K. Butler, B. Hare, A. Todisco, M. Wang, and J. Del Valle C2037

Pacing rate, halothane, and BDM affect fura 2 reporting of $[Ca^{2+}]_i$ in intact rat trabeculae
Y. Jiang and F. J. Julian C2046

Activated lymphocytes increase expression of 5-lipoxygenase and its activating protein in THP-1 cells
W. L. Ring, C. A. Riddick, J. R. Baker, C. K. Glass, and T. D. Bigby C2057

MODELING IN PHYSIOLOGY

Mutational analysis of Glu-327 of Na^+-K^+-ATPase reveals stimulation of $^{86}Rb^+$ uptake by external K^+
K. Tepperman, L. A. Millette, C. L. Johnson, E. A. Jewell-Motz, J. B. Lingrel, and E. T. Wallick C2065

SPECIAL COMMUNICATION

FLAG epitope positioned in an external loop preserves normal biophysical properties of CFTR
B. D. Schultz, A. Takahashi, C. Liu, R. A. Frizzell, and M. Howard C2080

RAPID COMMUNICATION

Activators of protein kinase C decrease Ca^{2+} spark frequency in smooth muscle cells from cerebral arteries
A. D. Bonev, J. H. Jaggar, M. Rubart, and M. T. Nelson C2090

CORRIGENDA

Volume 272, April 1997
Volume 41, April 1997

Pages C1380–C1387: M. Xing, L. Tao, and P. A. Insel. "Role of extracellular signal-regulated kinase and PKC_α in cytosolic PLA_2 activation by bradykinin in MDCK-D_1 cells." Page C1380, *line 27* from the top of the Abstract, there is a typographical error: the middle initial of P. A. Insel in the cited reference (C. Godson et al.) should be "A" not "S" and should read "C. Godson, K. S. Bell, and P. A. Insel. *J. Biol. Chem.* 268: 11946–11950, 1993."
